

SIX SEASONS
CONTRACTING

CAPABILITY STATEMENT / WESTERN AUSTRALIA / 2026

Care for your land. Support for your project.

Conservation field services, environmental monitoring and specialised plant support for government, land managers, consultants and regional projects across Western Australia.

20 YEARS

Conservation and
land-management
experience

INTEGRATED

Environmental, field and
compact plant capability

WA-WIDE

Responsive metropolitan
and regional delivery

DIRECT CONTACT

Owner involvement from
scope to handover

WHY SIX SEASONS

Proven experience. Personal service. Clear communication.

Six Seasons Contracting brings conservation experience, environmental field services and specialised plant support together. Whether you need extra capacity or help with a defined project, you work directly with Matt Moon from the first conversation to completion.

FIELD CAPABILITY / WESTERN AUSTRALIA

WHAT CLIENTS GAIN

ONE POINT OF CONTACT

Work directly with Matt Moon to agree the scope, coordinate the work and keep your project moving.

ENVIRONMENTAL CONTROLS

Access, site hygiene, dieback risk, retained vegetation and disturbance controls are built into planning.

READY FOR YOUR SITE

People, vehicles, plant, attachments, communications and recovery arrangements are matched to the scope.

CLEAR PROJECT REPORTING

GPS locations, photographs, observations, progress information and completion records support clear handover.

THREE CONNECTED CAPABILITY AREAS

Conservation field services

- Contract ranger services
- Conservation labour hire
- Environmental monitoring and field support

Vegetation and fire management

- Forestry mulching and fuel reduction
- Fire rehabilitation
- Feral-animal and weed-control support

Plant and project support

- Mini excavation and drainage works
- Skid-steer operations
- Plant mobilisation and transport

INTEGRATED SERVICE CAPABILITY

The right support for your land and your team.

Services can be engaged individually or coordinated around a broader conservation or land-management program. Planned configurations can include SVL97-class tracked plant with forestry-mulching, grapple and bucket attachments, compact excavation and beavertail transport. Final plant, personnel and permits are confirmed for each scope before mobilisation.

01 Contract Ranger Services

Leave coverage, patrols, asset and visitor-facility inspections, and defined operational assignments.

02 Conservation Labour Hire

Additional field capacity for rehabilitation, revegetation, monitoring support and seasonal programs.

03 Environmental Monitoring & Field Services

Flora and fauna monitoring, approved collection programs, habitat assessment, soil sampling, dieback support and weed surveys.

04 Forestry Mulching & Skid-Steer Operations

Fuel reduction, vegetation treatment, fire rehabilitation and material handling using task-matched tracked plant and attachments.

05 Feral Animal & Weed Control

Implementation support for approved control programs, targeted treatment, follow-up checks and traceable records.

06 Mini Excavation

Compact-excavator support for drainage, trenching, earthworks and site preparation where access and disturbance require close control.

07 Transport Services

Beavertail transport planning for compact plant, attachments and project equipment across Western Australia.

PREPARED FOR THE WORK

A clear plan. A personal approach. From first call to completion.

Scope, access, hazards, environmental controls and reporting expectations are agreed before fieldwork begins.

01

PLAN

Confirm scope, access, hazards, timing and site constraints.

02

PREPARE

Match people, plant, attachments, PPE and communications to the task.

03

DELIVER

Work within agreed boundaries, hygiene requirements and escalation pathways.

04

RECORD

Share progress, photographs, GPS details and completion records.

EXPERIENCE BEHIND THE SERVICE

Matt Moon / Director & Lead Field Operator

Matt brings 20 years of conservation and land-management experience, including national park ranger work. His approach combines care for the environment with clear communication and attention to the details that matter on site.

Relevant training & skills

- C-class and HR/HC driver licences; trained 4WD operation
- Forklift, skid-steer and excavator; basic dogging and rigging; CN/CV cranes
- Senior First Aid; fire crew member and crew leader training
- Authorised Compliance Officer training; Mechanical Engineering trade qualification
